Epoxy Coated Outdoor Coil**

**Nominal Cooling Capacity
33 kW – 46 kW**

ISD / OSA 330 - 460 – DUCTED SPLIT SYSTEM AIR CONDITIONERS

GENERAL

The ISD indoor unit, together with its associated OSA outdoor unit, provides a reverse cycle (heat pump) split system air conditioner designed and developed to comply with and exceed AS/NZS 3823 specified conditions (i.e. guaranteed cooling cycle performance at 43°C outdoor temperature).

The indoor unit is available with **belt drive** or **direct drive** fan.

APPLICATIONS

These units have been specifically developed for air conditioning of commercial premises, e.g. offices, motels, shops and restaurants.

Air Flow Selection

If the air returning to the indoor coil is regularly expected to be above 50%RH, then the coil face velocity should be limited to be 2.5 m/s or less (refer Air Handling graphs).

High humidity levels can occur in tropical or subtropical conditions, and/or when heavily moisture laden fresh air is introduced. Consideration must always be given to selecting an air flow and face velocity that avoids water carry-over problems.

Applications using full or high proportions of fresh air should be referred to your nearest **temperzone** sales office to establish the correct selection of units.

FEATURES

Refrigerant R410A. Each complete system uses refrigerant R410A which is deemed to have zero ozone depletion potential.

Efficient. The outdoor unit incorporates a high efficiency scroll compressor. Heat exchange coils incorporate inner grooved (rifled) tube for better heat transfer.

Performance. The ISD 330/405/460K models use a dynamically balanced forward curved fan with a multi-speed motor enables fine tuning of the indoor unit to match the supply air requirements. The ISD 331/406/461K models use an adjustable pulley driven indoor fan motor enables fine tuning of the indoor unit to match the supply air requirements. The system includes a temperature sensing head pressure control which enables the system to compensate for outdoor ambient temperatures below 20°C on cooling cycle, and above 15°C on heating cycle.

Quiet. The compressor is isolated in a built-in, insulated compartment to minimise noise. The indoor unit is also insulated for noise attenuation.

Durable. The outdoor coil fins are epoxy coated for extra protection in corrosive environments, e.g. salt laden sea air.

The outdoor unit's cabinet is constructed from high grade galvanised steel - polyester powder coated (grey) for all weather protection (IP 45). External fasteners are stainless steel. Heat exchange coils comprise aluminium plate fins on mechanically expanded rifled copper tube. The indoor unit's cabinet is constructed from high grade galvanised steel and also includes a polyester powder coated drain tray.

Service Access. The indoor unit's built-in drain tray can be removed for ease of cleaning and service accessibility.

Insulation. Closed cell foam insulation has been used in the indoor unit's cabinet to ensure no particles are introduced into the air stream. The insulation is foil faced and meets fire test standards AS 1530.3 (1989) and BS 476 parts 6 & 7.

Mounting. The ISD 330/405/460K indoor units can be mounted rigid, or using the optional spring mounting brackets which minimise transfer of vibration.

Self Diagnostics. The Outdoor Unit Controller (OUC) has a display of LEDs to indicate faults and running conditions. A non-specific fault indicator is included for interface to external systems.

OPTIONAL EQUIPMENT

Outdoor Unit:

1. Anti-vibration mounts (rubber)
2. Drain connection - right angle

Indoor Unit:

temperzone TZT-701 Controller kit.

ISD 330/405/460 K only:

1. Filter box - integrated return air spigot and washable polypropylene net filter.
2. Spring Mounting Kit.

ISD 331/406/461 K only:

1. Vertical supply air configuration.
2. Filters (rated EU4) integrated with return air spigot - four 50 mm deep pleated filters.

SAFETY FEATURES

1. HP and loss of refrigerant protection.
2. Anti-rapid cycle timer and internal overload for compressor protection.
3. Circuit breaker control circuits.
4. Time-and-temperature controlled electronic de-ice switch prevents icing up of the outdoor coil during heating cycle.
5. Frost protection on cooling cycle.
6. Sensor fault indication.
7. Compressor minimum run time to ensure oil return.

COMPRESSOR

Each high efficiency scroll type compressor is hermetically sealed, quiet running and supported on rubber mounts to minimise vibration.

REFRIGERATION PIPING

The standard unit contains oil for a line length of up to 30 m; extendable to 70 m with additional compressor lubricant.

For extended line lengths contact your nearest **temperzone** sales office for additional details on piping requirements.

Max. height separations between units are :

Outdoor unit above indoor unit : 20 m
Outdoor unit below indoor unit : 20 m.

Each OSA is shipped from the factory with a holding charge of HFC-410A (R410A) refrigerant. Liquid and suction service valves are provided. Accurator expansion devices control the flow of refrigerant. The matched indoor unit is shipped with a holding charge of nitrogen. Both units have brazed pipe connections.

WIRING

The electrical supply required (including voltage fluctuation limits) is: 3 phase 342–436 V a.c. 50 Hz with neutral and earth.

The compressor crankcase heater requires a 24 hour power supply. A control panel, with 24V control circuit, is located in the outdoor unit and is fully wired ready to accept the main power supply.

The manufacturer operates a quality management system that conforms to **AS/NZS ISO 9001:2000**.

Ask about our **ISD 430K/OSA 430RK** system with digital compressor option.

PERFORMANCE DATA

COOLING CAPACITY (kW)

Total = Total Capacity (kW)

E.A.T. = Entering Air Temperature

Sens. = Sensible Capacity (kW)

() = Nominal Capacity (kW)

Note: Capacities are **gross** and do not include allowance for fan motor heat loss. Capacities are for close coupled systems. Interconnecting pipework will reduce capacity.

PERFORMANCE DATA

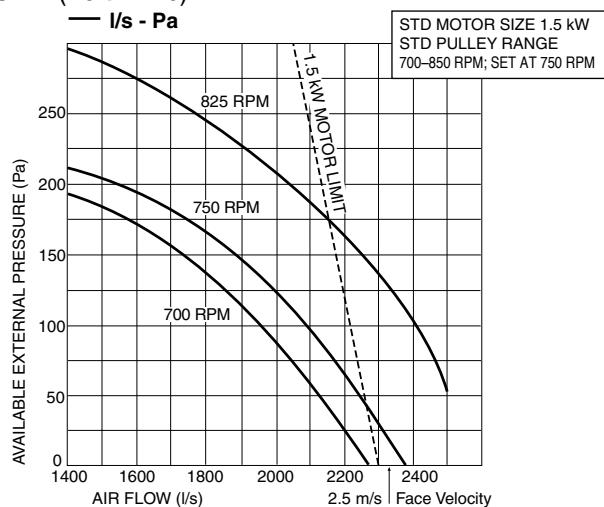

ISD 330K (Direct Drive)

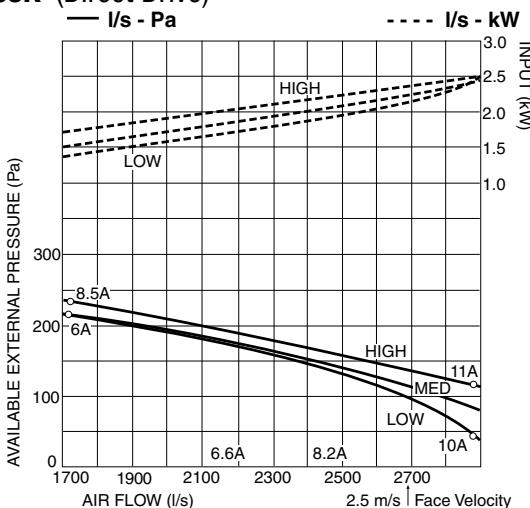

AIR HANDLING

Note: Airflows are for a dry coil. Reduce airflow by 5% in high moisture removal conditions. In a free blow or low resistance application, beware of exceeding indoor fan motor's full load amp limit (refer back page). As filters are optional, the fan air flows given are for units installed without filters. If using EU-2 filter media, provide 0.08 m² face area per 100 l/s of airflow to maximise efficiency.

Pipe Sizes (mm OD):	- Suction	28		35										
	- Liquid	13		16										
Finish:	- Indoor Unit	zinc galvanised steel												
	- Outdoor Unit	grey polyester powder coat												
Weights (net/shipping) (kg):	- Indoor Unit	131 / 145	220 / 260	181 / 191	225 / 265	190 / 200	245 / 280							
	- Outdoor Unit	256 / 282		301 / 339		375 / 412								

Notes:

*¹ Nominal Cooling Capacity at AS/NZS 3823 conditions:

Indoor Entering Air Temperature 27°C D.B., 19°C W.B.;
Outdoor Entering Air Temperature 35°C D.B.

*² Heating Capacity (reverse cycle units only)

at AS/NZS 3823 conditions:

Indoor Entering Air Temperature 21°C D.B.;
Outdoor Entering Air Temperature 7°C D.B., 6°C W.B.

*³ Supply air flow at Nominal Cooling Capacity conditions stated above.

*⁴ Sound Power Levels (SWL) are measured at nominal cooling capacity conditions stated above.

*⁵ Voltage fluctuation limits 342–462 V.

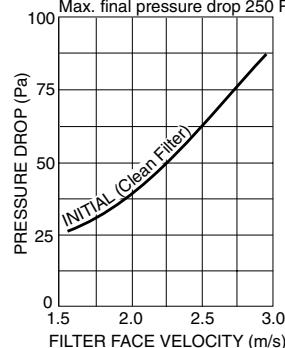

*⁶ Refer to manufacturer for additional piping requirements.

FILTER PRESSURE DROP

ISD 331K, 406K, 461K

Optional EU4 rated pleated filter.

Based on Koch Multi-Pleat HC filter.
Max. final pressure drop 250 Pa.

Available from

temperzone limited

Head Office, Auckland : 38 Tidal Rd, Mangere, N.Z.
Private Bag 93303, Otahuhu, NEW ZEALAND.
