DECEMBER 1998

ISD 125Q / OSA 125 DUCTED SPLIT SYSTEM AIR CONDITIONER

GENERAL

ISD 125Q - Indoor unit usable for reverse cycle or cooling only
OSA 125 - A general designation for outdoor unit
OSA 125C - Outdoor unit, cooling only version
OSA 125R - Outdoor unit, reverse cycle version

The ISD indoor unit, together with its associated OSA outdoor unit, provides a three phase split system air conditioner designed and developed to comply with and exceed A.R.E.M.A. UEPS(7/84) specified conditions (i.e. guaranteed cooling cycle performance at 46°C outdoor temperature).

APPLICATIONS

These units have been specifically developed for air conditioning of light commercial and residential premises, e.g. offices, motels, shops and homes.

FEATURES

Efficient. The outdoor unit incorporates a high efficiency scroll compressor. Heat exchange coils incorporate inner grooved (rifled) tube for better heat transfer.

Performance. A dynamically balanced forward curved fan with a multi-speed motor enables fine tuning of the indoor unit to match the supply air requirements.

Quiet. The compressor is isolated in a built-in, insulated compartment to minimise noise. The indoor unit is also insulated for noise attenuation.

Slimline. The compact up-right design of the outdoor unit requires only a 150 mm gap on the coil side where installation is against a wall. Its slimline cabinet is particularly practical where there is restricted space, e.g. side access pathways, balconies, narrow ledges, etc. The unit is free standing, but can be fitted on a wall using the optional wall mounting brackets.

Durable. The outdoor unit's cabinet is constructed from high grade galvanised steel - polyester powder coated for all weather protection. External fasteners are stainless steel. The indoor unit's cabinet is constructed from high grade galvanised steel and includes a polyester powder coated drain tray.
Heat exchange coils comprise aluminium corrugated plate fins on mechanically expanded rifled copper tube.

Service Access. The indoor unit's built-in drain tray can be removed for ease of cleaning and service accessibility.

Insulated. Closed cell foam insulation has been used in the indoor unit's cabinet to ensure no particles are introduced into the air stream.

Mounting. The indoor unit can be mounted rigid, or using the optional spring mounting brackets which minimise transfer of vibration.

STANDARD EQUIPMENT

ISD Indoor Unit:
1. Coil
2. Fan - forward curved centrifugal
3. Fan motor - multi-speed
4. Accurator expansion device
5. Drain tray - powder coated, removable
6. Spigots - supply and return

OSA Outdoor Unit:
1. Compressor
2. Coil
3. Fan motor - multi-speed
4. Propeller fan - direct drive
5. Fan guard
6. High/low pressure switch
7. Circuit breaker control

OSA 125R version also includes:
8. Reversing valve
9. Accurator expansion device
10. Time/temperature electronic de-ice control

OPTIONAL EQUIPMENT

Outdoor Unit:
1. **temperzone** HP Fan Speed Controller (4 amp) - recommended where cooling is required in below 20°C ambient conditions for long periods of time.
2. Epoxy Coated Coils - for protection in corrosive environments.
3. Wall mounting brackets.

Indoor Unit:
1. Filter box - integrated return air spigot and washable filter (rated EU2).
2. Spring Mounting Kit.
3. 3 kW electric booster heater box - complete with heater safety cutout thermostat and air flow switch.

SAFETY FEATURES

1. HP switch (auto reset), LP switch (auto reset) and an anti rapid cycle timer for compressor protection. The compressor also has internal overload protection.
2. Circuit breaker control circuits.
3. Time-and-temperature controlled electronic de-ice switch prevents icing up of the outdoor coil during heating cycle (OSA 125R only).

COMPRESSOR

Each high efficiency scroll type compressor is hermetically sealed, quiet running and supported on rubber mounts to minimise vibration.

REFRIGERATION PIPING

The standard unit allows for a line length of up to 35 m.

Max. height separations between units are :
Reverse Cycle systems:
Outdoor unit above indoor unit : 12 m
Outdoor unit below indoor unit : 12 m.
Cooling Only systems:
Outdoor unit above indoor unit : 18 m
Outdoor unit below indoor unit : 12 m.

For extended line lengths contact your nearest **temperzone** sales office for additional details on piping requirements.

The OSA 125 is shipped from the factory with a charge of HCFC-22 (R22) refrigerant sufficient for a 10 m line length. Liquid and suction service valves are provided. The matched indoor unit is shipped with a holding charge of nitrogen. Both units have one flare and one brazed pipe connection.

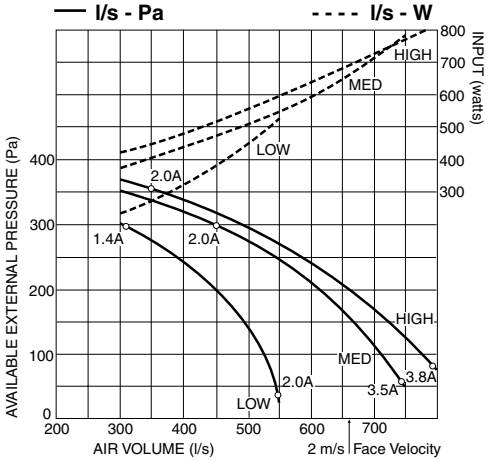
WIRING

The electrical supply required (including voltage fluctuation limits) is:
3 phase 342-436 V a.c. 50 Hz with neutral and earth. A control panel, located in the outdoor unit, is fully wired ready to accept the main power supply.

The manufacturer operates a quality management system that conforms to international standard ISO 9002.

AIR HANDLING

Note: In a free blow application, beware of exceeding indoor fan motor's full load amp limit.



ELECTRICAL

E.E.R. / C.O.P. (cooling)	10 / 2.9
Indoor Fan Full Load Amps	5.7 A
Running Amps (Total System)	9.4 / 6 / 6
Recommended External Fuse	25 A

NOTE

Materials and specifications are subject to change without notice due to the manufacturer's ongoing research and development programme.

PERFORMANCE DATA

COOLING CAPACITY (kW)

Total = Total Capacity (kW) Sens. = Sensible Capacity (kW)
E.A.T. = Entering Air Temperature ◯ = Nominal Capacity (kW)

Note: Capacities are **gross** and do not include allowance for fan motor heat loss. Capacities are for close coupled systems. Interconnecting pipework will reduce capacity.
