HITACHI

+ 4G controller

Control your system
from anywhere.

Temperzone is pleased to introduce the leading-edge technology to give you precision control of your ducted air conditioning.

iZone's touch screen and Wi-Fi technology gives you total temperature control of each room individually. The system features an intuitive touch screen interface that is elegant, easy to use and exceptionally efficient.

- Adjust the air distribution, temperature or airflow to any room.
- Direct airflow to only the rooms you choose for maximum efficiency and savings.
- Select up to 12 touch screen consoles or sensors – every room will be at the temperature you want, all the time.
- Maximize comfort, while minimizing energy use and household running costs.
